FIX

we will diagnose and fix faults

OVERHAUL

we will carry out a full service on your amp

TUNE

we make sure your amp sounds as good as it can!

Why use Electric Voice?

Our engineer, Bernard, has been involved with valve amps in the music industry when they emerged in the 60's through association with JMI Jennings Musical Industries (VOX) Ltd., ElectroVoice and Knowles Ltd (who supplied the head-set communication systems for the early NASA space flights).

In his 43 years in the business, he has worked on equipment used by The Beatles, The Shadows, The Rolling Stones and Pink Floyd to name but a few!

Bernard is qualified under BS7671 in Test & Inspection and a former fellow of The Institute of Sound and Communication Engineers

To discuss your valve amp problems with Bernard call:
